

## CALL FOR PARTICIPANTS

TO MEDICAL EDUCATION PROGRAM ON

### ACQUIRED AND INHERITED APLASTIC ANEMIA IN PEDIATRIC AND ADULT

[ERN-EuroBloodNet](#) is endorsing via EuroBloodNet Association a preceptorship held in ERN-EuroBloodNet's highly specialized center for Aplastic Anemia (AA) with the objective to provide applicants with the fundamental tools for a correct diagnostic and treatment approach to Aplastic Anemia in pediatric, adolescents and adult patients.

The hosting of the preceptorship is:

- [Assistance Publique Hôpitaux de Paris, Hôpital Saint Louis, France](#) – coordinated by [Prof Régis Peffault de la Tour](#)

The preceptorship is accredited with Continuous Medical Education points issued from the [European Board of Accreditation in Hematology](#) (EBAH) and aims to:

- Train medical resident in haematology and young haematologists in patient care, including diagnostic tools, optimal use of available and new drugs, and in the field of Aplastic Anemia supportive care
- Learn or improve medical resident in haematology and young haematologists knowledge in clinical research, including participation to registries and clinical trials
- Stimulate cross-border collaborations between medical residents in haematology and young haematologists

This preceptorship will last 5 days, and host 5 participants. It includes several formats: formal lectures, informal discussion, case study discussion, and direct tutorial activity in the clinic and/or in a laboratory. Please, note that each candidate can participate only to one preceptorship program endorsed by the ERN-EuroBloodNet.

#### Participants profile:

- Medical Resident in Hematology
- Participants must be affiliated to European Member States Healthcare providers (HCPs). Priority will be given to HCP member or Affiliated partner of the ERN-EuroBloodNet
- Interest in developing their medical competences in the clinical area of aplastic anemia
- In a position to follow-up the preceptorship with education projects and activities on medical education
- Available for the whole duration of the preceptorship
- English speaker

**Knowledge assessment:**

Delegates will be evaluated by teachers during the training by clinical reasoning and oral presentation, taking into consideration level of initiative, knowledge, and ability to self-start of competency assessment skills. Evaluation could require a case study or/and a written evaluation as a satisfactory survey or quiz will also be written by participants and teachers. Teachers of the preceptorship, based on the exchange with the participants and the knowledge and competences acquires will evaluate if participants have concluded successfully the training and are entitled of CME points.

**PRECEPTORSHIP at [Assistance Publique hôpitaux de Paris, Hôpital Saint Louis, Paris](#).**

- Topic: Acquired and Inherited Aplastic Anemia in pediatric and adult
- Coordinated by [Prof Régis Peffault de Latour](#)
- 5 participants
- 28th September – 2d October 2026
- Deadline: 15th June 2026 (23:59 CET)

**Description**

The preceptorship will provide applicants with the fundamental tools for a correct diagnostic and treatment approach to marrow failures, including AA and PNH, in pediatric and adult patients. The spectrum of marrow failure syndromes in pediatric ages has a different composition compared to adults because of a larger proportion of inherited forms sometimes with masked or misleading phenotypes. Also, AA and PNH show some differences as for approach and outcome respect to adult forms.
